

Volunteer Opportunities!

We are always looking for people interested in patrolling Mousam Lake via canoe or kayak, to routinely check vegetation along the shoreline. The purpose is to quickly identify any invasive aquatic plant that may have found its way into our lake. If they are found quickly, eradication is much more likely.

The goal is to find interested people from various locations around the lake to do late summer/early fall checks on our lake vegetation. You pick the date, time and location you wish to patrol. Any and all interested parties are welcome.
